The Women in Physics Committee of the LTU Society of Physics Students welcomes you to our Guest Lecture

From Galaxies to Stars to Planets: A Research Journey

Dr. Kaitlin Rasmussen, Postdoctoral Research Fellow,

University of Michigan

Education: B.S. in Physics & Astrophysics, Florida
State University and PhD in Physics, University of
Notre Dame

As an undergraduate, I studied active galactic nuclei. Then, in graduate school, I studied metal-poor stars and the origins of the elements. Now, as a post-doc, I study a variety of topics in exoplanets which lead toward the search for life. In this four-part talk, I will discuss my journey from college to now alongside my current research and what I learned along the way.

**Registration required for in-person attendance. By
registering, you will receive location information.**
